openDr

What We Do

openDr makes it possible for patients and providers to book **real-time** appointments and complete the registration process online.

Provide patients online access and convenience

Increase scheduling workflow efficiency

Streamline the referral process

Designed for hospital systems and large medical/radiology practices

What do we mean by real-time?

openDr appointments are just like the process of booking an airline seat. Patients can see availability in real-time and booked appointments are seamlessly added to your EMR/RIS via our bi-directional interface.

Why is digital self-scheduling important?

Patients are increasingly consumer-minded and empowered shoppers who demand an online experience from start to finish. It is time to start giving patients access in a way that is consistent with other industries.

What are the benefits?

Patient Experience

- 24/7 access to scheduling
- Appointment reminders and prep instructions
- Paperless forms and check-in
- Referring providers can book appointments
- Discharged from the hospital with a booked appointment

Provider Benefits

- Schedule outside normal business hours
- Reduce no-shows and have better prepared patients
- Increase efficiency
- Reduce operational expenses
- Referral management
- Reduce leakage and readmissions

Our Expertise

Translate complex scheduling processes into a patient friendly front-end experience

Interface with existing systems to create a real-time environment

Sophisticated backend development

openDr

How Does it Work?

openDr makes it possible for patients and providers to book **real-time** appointments and complete the registration process online, not just make a "request" for an appointment. Here's how it works.
Schedule Appointment

Pre-Appointment Questionnaire
Our logic-based algorithms lead patients to the correct appointment type.

View the Schedule
Patients can view all available time slots based on your scheduling rules and exceptions.

Insurance Eligibility
Verify in real-time and prior to the appointment.

Paperless Forms & Registration
Patients can complete forms online and at their convenience, reducing paper and saving time and money.

Reminders & Prep Instructions
100% of your patients can start receiving text & email reminders, resulting in reduced no-shows and better prepared patients.

Appointment Booked!
Booking is in real-time, meaning the booked time slot is seamlessly added to your EMR/RIS system via a bi-directional interface.

Mobile Check-In
When patients arrive for their appointment, they can check in instantly via their smartphone.
